

Ultimate Blue

Composite Solar Collector

Combining the Best into One

Ultimate Blue is Boss Patented technology using State-of-the-Art Co-Extrusion techniques to provide a **Multi**Layered Composite Solar Strip collector with the best properties and warranty in the industry.

The **Max**Black outer layer and web material has the best UV Weathering Resistance package available. It utilizes a high matting agent to maximise Solar Absorption and has increased Toughness in order to Resist Mechanical Damage and Puncturing.

The **Ultimate Blue** inner layer has the best chemical, flex fatigue and barb sealing properties available, in addition to Enhanced Heat Conductivity.

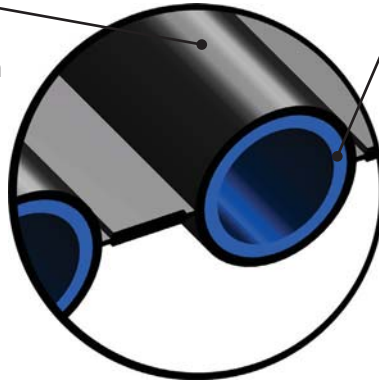

COMPROMISE IS NOW HISTORY

COMBINING THE BEST INTO ONE

MaxBlack Outer Material

- Maximum UV Resistance
- Maximum Heat Absorption from the Matt Skin
- Increased Toughness to Resist Mechanical damage

Ultimate Blue Inner Layer

- High Nitrile Formulation
- Maximum Chemical Resistance
- Enhanced Resistance to Flex Fatigue
- Maximum Sealing Retention to barb
- Enhanced Thermal Conductivity

THE RESULT IS A SOLAR COLLECTOR THAT IS:

MultiLayered Construction, combining the Best materials in the Best position

Optional Punched Web (10 tube only)

Superior to any Comparable Offering

Quality Certification ISO 9001

'Long Life,' 15 year Warranty*

Australian Standards AS 2369.2-1993

Formulated to withstand Harsh Australian Conditions

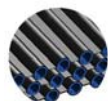

Lead Free: Safe for drinking water collection

Proudly Designed and Manufactured in Australia

Available through Solar Pool Heating Professionals only

150mm wide 10 tube x \varnothing 6mm ID
